

ENVIRONMENTAL PROTECTION AGENCY OF LIBERIA (EPA)
P.O. BOX 4024
SEKOU TOURE AVENUE, MAMBA POINT
1000 MONROVIA 10, LIBERIA

Job title		Project Procurement Officer	
Procuring Entity		Environmental Protection Agency	
Programme/Project		Strengthening Agricultural Resilience through Transformational Livelihood Adaptation in Liberia (SARTLA)	
Activity result		Effective and efficient procurement for the smooth operations and implementation of the project activities	
Assignment		Ensure and coordinate all procurement activities of the project in accordance with the project document and the republic of Liberia Public Procurement and Concession Act (PPC Act) and regulations thereunder. Ensure that procurement processes adhere to GEF procurement guidelines / standards for the smooth implementation of the project.	
Location	Monrovia with travel to other project counties in Liberia	Duration	One year initially with possibility of renewal every year for 5 years (project duration) depending on performance and availability of funds.
BACKGROUND Liberia possesses natural resources and fertile land along with valuable fishing areas; however, it grapples with development hurdles linked to environmental damage and inadequate infrastructure and institutions despite its abundance of resources. The nation encounters difficulties in enhancing smallholder agriculture and fisheries performance that impact people's livelihood opportunities well as food security and hinder overall economic progress. The Country also faces challenges due to the extensive damage to its land and coastal regions caused mainly by unchecked human actions like building construction and roads as well as mining activities and urban growth that led to pollution issues. These harmful activities have greatly harmed the ecosystems for supporting agriculture and fishing industries. The impacts of climate change exacerbate these dangers by hastening land and coastal deterioration while diminishing the resources essential for the local communities' sustenance.

The ecosystems in the country are facing challenges with a focus specifically being placed upon wetlands and coastal areas such as mangroves which play a key role as protective barriers during storms and habitats for marine life growth; these areas are at high risk due to rising sea levels and temperatures along with more powerful storm surges present in the oceans today causing concerns for both biodiversity loss and increased threats of flooding and erosion to nearby coastal communities.

Liberia's economy and communities are greatly affected by the effects of climate change with a focus particularly toward increased flooding and coastal erosion caused by rising sea levels and severe weather conditions like storm surges in regions such as Monrovia and other cities in Liberia including Robertsport and Harper where informal settlements face significant risks due to lack of proper infrastructure leading to regular flooding incidents causing damage to buildings and infrastructure as well as health issues due to sanitation problems.

Rising ocean temperatures pose a threat to marine environments beyond physical dangers by putting fish stocks at risk. Crucial for the nation's fisheries and food security backbone. The issue of overfishing worsens with the deterioration of mangroves and coastal habitats leading to a decline in fish populations. As per the IPCCs Assessment Report, findings suggest that West Africa is anticipated to be heavily impacted by climate change with projections pointing towards elevated temperatures and more frequent occurrences of heatwaves and extreme precipitation events which could result in increased flooding, especially, in Liberia and neighboring regions.

Liberia's economy depends significantly on resources and is at high risk of being impacted by climate related events due to its low ability to adapt to such changes as indicated by its position as the 177th out of 185 countries as per the ND-GAIN index ranking. The vulnerability is exacerbated by poverty levels and inadequate infrastructure and education which impede communities from preparing for climate related risks.

Small scale farmers and fishers play a role in rural communities and are particularly at risk due to various challenges they face such as limited access to essential resources like fertilizers or quality livestock as well as issues with irrigation systems and lack of financial support for their operations. Adverse weather conditions like rainfall or drought coupled with extreme temperatures can negatively impact crop production leading to lower yields and a rise in pest related issues affecting the agricultural sector. For those involved in fishing activities, marine heatwaves and coastal floods can harm fish populations and damage infrastructure crucial for their livelihoods, putting food security and income sources at risk.

Around 80% of the agricultural labor force is led by women and they play a role in producing about 93 percent of the food supply; however, they are especially impacted by climate change compared to men and other factors like higher illiteracy rates and restricted access to land and resources as well as cultural norms that limit their decision-making authority in farming matters.

In the face of these obstacles and difficulties, lies the chance to enhance resilience by adopting innovative methods rooted in system based transformational strategies. One potential the project seeks is to enhance climate resilience within societies reliant on natural assets through ecosystem restoration efforts and

1000 MONROVIA 10, LIBERIA

enhancements through extension services while also enabling financial access and fostering sustainable value chains.

The project will employ a combination of interventions that focus on i) the adoption of resilient and regenerative practices among farmers and fisherfolks to improve productivity while at the same time reducing environmental impacts, ii) linking local livelihoods to sustainable value chains, developing alternative livelihood strategies such as those linked to eco-tourism, and fostering market access through business skills training, and iii) providing an enabling innovative finance environment that fosters private sector engagement, links actors along the value chain and scales the development of sustainable enterprises based along the value chain.

The project is expected to enhance the management of 3,640 hectares of land and coastal regions in efforts to promote climate resilient practices; target an overall 81,800 individuals spread across seven project counties. These efforts aim to empower them to recognize climate related challenges and implement appropriate adaptive strategies. Additionally, the initiative strives to attract 500,000 (US\$) investments from private sector entities and support the growth of 30 micro-small and medium enterprises (MSMEs) involved in climate resilience initiatives through a combination of technical guidance, financial partnerships, or direct funding. The Environmental Protection Agency as the National Designated Authority (NDA) and focal entity for the management of the environment and natural resources in Liberia is empowered to coordinate monitor, supervise and consult with relevant stakeholders on all activities in the protection of the environment and sustainable use of natural resources.

The Environmental Protection Agency (EPA), in close collaboration with the Ministry of Agriculture (MOA), Ministry of Commerce and Industry (MoCI) and the Ministry of Information, Culture and Tourism (MICAT) will implement the project through a Project Management Unit, based at the MOA. The UNDP – as an Accredited Entity to the GEF – will oversee the project execution undertaken to ensure that the project is being carried out in accordance with UNDP and GEF policies and procedures and will provide quality assurance support services to the SARTLA project. The Project Management Unit (PMU) will assist the implementation of the Project with support from the EPA and MOA. The PMU staff will be hosted at the MoA and will report to the Minister of the MOA and the EPA-ED through the Project Manager. The Project Manager is responsible for the overall day-to-day management of the project including the mobilization of all project inputs, supervision over project staff, responsible parties, consultants and sub-contractors. The PMU – through the project manager – provides strategic guidance and direction to the Project Board, the Executive Director/CEO of the EPA, the Minister of MOA, and the UNDP Liberia Resident Representative.

OBJECTIVE

The Project Procurement Officer's primary responsibility is to properly ensure and coordinate all procurement activities of the project in accordance with the project document and the republic of Liberia Public Procurement and Concession Act (PPC Act) and regulations thereunder. The Project Procurement

Officer is also expected to ensure that all procurement processes adhere to GEF procurement guidelines / standards for the smooth implementation of the project.

The Project Procurement Officer will form part of the PMU staff and will work closely with the Project Manager, the Administration and Finance Assistant, Monitoring & Evaluation Officer, Gender, Safeguard & Stakeholder Engagement Expert, Knowledge Management & Communication Officer, Innovative Finance Expert, and Driver under the direct supervision of the Executive Director.

DUTIES AND RESPONSIBILITIES

Under the guidance, direction and supervision of the Project Manager, the Project Procurement Officer will be responsible for performing the following but not limited to:

- Ensure and coordinate all procurement activities of the project in accordance with the project document and the republic of Liberia Public Procurement and Concession Act (PPC Act) and regulations thereunder
- Ensure compliance with procurement activities with GEF, UN/UNDP rules, regulations, policies and strategies; implementation of effective internal control;
- Prepare procurement plans and implement their monitoring.
- Organize procurement processes including preparation and conduct of RFQs, ITBs or RFPs, receipt of quotations, bids or proposals, their evaluation, negotiation of certain conditions of contracts in full compliance with UNDP rules and regulations.
- Preparation of Purchase Orders (PO) and contracts;
- Implement the internal control system which ensures that purchase orders are duly prepared and dispatched.
- Ensure timely corrective actions on POs with budget check errors and other problems.
- Present reports on procurement.
- Ensure implementation of sourcing strategy.
- Ensure proper Control of UNDP/GEF supported-project assets focusing
- Perform other duties relating to procurement for the project as may be assigned by the Project Manager.

EXPECTED OUTPUTS AND DELIVERABLES

Compliance and effective and efficient procurement for the smooth operations and implementation of the project activities by means of effectively reporting on activities procurement processes and results on a monthly, quarterly and annual basis to the EPA, MOA, the PSC and the UNDP as required by the project document while adhering to the GEF guidelines and standards under the supervision of the Project Manager.

INSTITUTIONAL ARRANGEMENTS

The Project Procurement Officer will be under the supervision of the Project Manager and will work closely with all the staff of the PMU. He/ She will report directly to the Executive Director/Chief

ENVIRONMENTAL PROTECTION AGENCY OF LIBERIA (EPA)
P.O. BOX 4024
SEKOU TOURE AVENUE, MAMBA POINT
1000 MONROVIA 10, LIBERIA

Executive Officer of the EPA and Minister of MOA, with guidance or consultation with the Project Manager.

The Project Procurement Officer shall be recruited for a period of 1 year (12 months) under a Service Contract appointment renewable for a period of 5 years (duration of the Project) subject to satisfactory performance and availability of funds. The EPA and MoA reserve the right to rescind the contract during that period should the performance of Project Procurement Officer not meet its requirements.

QUALIFICATIONS

Education

- The Project Procurement Officer must have a Minimum of bachelor's degree in procurement or supply chain management, Accounting; Business Administration; Logistic management or a related discipline for the assignment
- A Certified Public Procurement or Accountant certification is an added advantage;

Experience

- At least 5 years of progressive relevant work experience in public procurement or supply chain management, accounting, and or financial-related work with good knowledge of the application PPCC process, systems and procedures;
- Good working knowledge of using Microsoft Office spreadsheets, word processing and computerized accounting systems;
- Excellent computer skills and knowledge in use of computer software packages for word processing, excel, power point, databases and spreadsheets etc.
- Experience in working on GEF, GCF or UNDP funded project

Competencies and skills

- Excellent interpersonal communication and facilitation skills;
- Able to uphold and respect procurement ethics and to conduct activities with integrity;
- Team player who demonstrates patience, flexibility and honesty;
- Be willing and able to meet tight deadlines and work long hours when required;
- Self-starter, who is able to plan and manage his/her own work, takes initiative and strives to meet deadlines
- Ability to work under minimum supervision to meet short deadlines;
- Ability to write and communicate clearly and logically;
- Excellent spoken and written English;
- Ability to identify client needs and deliver them promptly and accurately;

SUBMISSION OF APPLICATION

Interested candidates should send a CV and a cover letter indicating their suitability for the post and copies of credentials to the Environmental Protection Agency. All interested candidates are to address their applications and to the following address:

ENVIRONMENTAL PROTECTION AGENCY OF LIBERIA (EPA)
P.O. BOX 4024
SEKOU TOURE AVENUE, MAMBA POINT
1000 MONROVIA 10, LIBERIA

ATTENTION:

Mr. Pescee T. Doe
Assistant Director/Procurement
Environment Protection Agency (EPA)
Bright Building 302 A, Sekou Toure Avenue
Mamba Point
1000 Monrovia, 10 Liberia
P.O. Box 4024

Application can also be received through email: (ptdoe@epa.gov.lr). Please indicate “**Project Procurement Officer - Strengthening agricultural resilience through transformational livelihood adaptation in Liberia (SARTLA)**” in the subject line.

The closing date for submission of applications is **4pm, October 23, 2025**. Any submission received after this deadline will not be considered. Only applicants that meet the requirements as outlined in the terms of reference will be considered for evaluation.

***Females are highly encouraged to apply!**
